ABOUT

I am a computer science undergrad who loves building software, learning and sharing my learnings along the way. I believe in having a vision of future and executing towards it in present.

SKILLS

Languages : Javascript, C++ , Solidity, TypeScript, Python, HTML ,CSS

Frameworks/Libraries : React , React-Native, NextJS, Redux Tool Kit- React Query , ExpressJS, NodeJS , MongoDB, Various Styling Frameworks

Tools/Platforms : Supabase, Firebase, Cloudinary, AWS Amplify, Github, Git, Vercel, Heroku, Postman

INTERNSHIP EXPERIENCE

Anheuser-Bush Inbev - Digital Solutions Intern

- Studied the journey of product from production to customer and proposed solutions with potential of savings of approx. \$1.5 Million.

Leap.Club - SDE Intern (React Native)

- Built core parts like Authentication Flows, State Management with ReduxTK Query, API Integration & Clean UI of a mobile app used by thousands of women. Also contributed to a NextJS code-base building the web version of the mobile app.

Get Breakout - React Engineer Intern

- Worked on the Client Side of an extensive React code base, remotely at this startup, with a goal to automate tedious business processes. - Built critical features like Payments integration with Stripe, Super Clean UI & integrated various API s from backend.

Chabraine Technologies - Full Stack Intern

- Built Full Stack Web apps with extensive use of React ,TypeScript , AWS Services and various Web technologies.

PROJECTS

Built Multiple Full Stack WebApps & Mobile Apps

- Using React and React Native for UI, Redux Toolkit for state management on Client Side.
- Using Express as server and MongoDB as Database Authentication(JWT & Cookies) on server & server-less platforms like Firebase, Supabase, AWS Amplify, Auth0.

Launched App to Play Store

- Learned mobile app development, built & released Remote Hub to [playstore](#) in around 15 days, while documenting the progress [here](#).

Created Sendecentralized, Remote Hub, HackrNews, PeopleUAdmire - Used by Hundreds of People

- **Sendecentralized** - A decentralized way to send files from one point to another using smart contracts deployed on the Polygon, IPFS & Chainlink. No centralized servers store the files.
- **Remote Hub** (500+ Play Store Installs) - Remote Hub has 100s of remote tech jobs, one can apply to or save for later.
- **HackrNews** - Read the Best of Tech on a fast PWA built with web's best technology.

Creating Computer Science Content:

- I share the learnings in my journey on YouTube - [Saumya Nayak](#) .
- I write blogs on my own [site](#) & developer blogging platforms like [Hashnode](#) & Medium.

Some Live Projects

[Sendecentralized](#), [Remote Hub](#), [HackrNews](#), [People U Admire](#), [A Fully Responsive Clone](#), [An MERN Admin with Pagination](#), [BitBuzz](#)

EDUCATION

ITER ,SOA University , Bhubaneswar - Average CGPA : 9.11/10.0	2019-2023
Vikash Residential School - 11 th -12 th CBSE - Percentage : 83.0%	2016-2018
St.Mary's School - 10 th ICSE - Percentage : 81.3%	2012-2016

ACHIEVEMENTS

Facebook HackerCup

- Qualified for Round 2 of Facebook HackerCup 2020.

Creating Computer Science Content

- 100+ followers on Developer Blogs like [Hashnode](#) & [Dev.to](#).
- 34 Github Followers & 24 Stars around multiple [Github](#) repositories.
- 700+ Subscribers on Youtube - [Saumya Nayak](#) .
